

ONLINE TRAINING CMMC

CampusGuard's CMMC Training Course offers a foundational understanding of the Cybersecurity Maturity Model Certification (CMMC) and the essential controls required for compliance.

This course includes the following modules:

- **Protecting Controlled Unclassified Information (CUI):** This training module provides a foundational overview of CUI and explains its relevance to daily work activities. Learners are introduced to what CUI is, why it matters, common risks and violations, and individual responsibilities for incident reporting and compliance.
- **CMMC Compliance for Higher Education:** This module explains how CMMC applies to higher education and outlines the organizational and individual roles required to maintain eligibility for federal funding and contracts.

Key Takeaways:

- CMMC compliance is essential for maintaining eligibility for DoD-funded research and contracts.
- Protecting CUI is a shared responsibility across departments, not limited to IT or security teams

Target Audience: Faculty, staff, researchers, and contractors who access, store, transmit, or manage CUI, and the technical staff that support them, particularly within federally funded or DoD-related research and operations.

Course Length: 20 minutes
