ONLINE TRAINING
GDPR

GDPR

CampusGuard's GDPR Training Course provides an overview of the General Data Protection Regulation and how it applies across organizations. This course will review:

- Key concepts and requirements from GDPR
- Best practices for collecting and processing personal data
- Individual rights granted under GDPR
- Violations and penalties for non-compliance
- Real-world examples and lessons learned

Modules include:

- **GDPR Overview:** This training module introduces the General Data Protection Regulation (GDPR), provides an overview of the regulation's requirements, and helps users understand what impact the GDPR may have within their organizations.

- **Complying with the GDPR:** This module reviews best practices for data collection and handling, safeguards for protecting data, and requirements for reporting potential data breaches. The module also reviews several real-world examples of risks and lessons learned.

Target Audience: All staff within an organization who handle, process, or have access to the personal data of EU residents.

Course Length: 20 minutes
