

ONLINE TRAINING

Phishing

CampusGuard's Phishing Training Course is designed to help your organization and staff understand the common goals and strategies found within phishing campaigns and how to proactively identify red flags and phishing indicators within email messages.

Our Phishing Awareness online training course will provide employees with tools to proactively identify potential phishing emails and prevent the accidental disclosure of sensitive information.

Modules include:

- What Is Phishing?
- Rules for Spotting Phishing
- Phishing Practice

The Phishing training modules can be used in combination with CampusGuard's Information Security Awareness Training for all staff, or as targeted, reinforcement training for users that may need additional education following a [Phishing engagement](#) from the RedLens InfoSec team.

Target Audience: All faculty/staff

Course Length: 25 minutes
