

Online Training Information Security and Compliance

[CampusGuard's Online Training courses](#) focus on information security and compliance topics to engage employees in your ongoing security awareness programs. Our courses feature enhanced content delivery, interactive elements, and gamification for a more immersive experience.

Why Choose CampusGuard for Your Online Training Needs?

We work closely with your team to go beyond checking the box to meet compliance requirements by creating a customized, impactful, and effective awareness training program that matches your organization's objectives:

- We use a consultative approach to guide you in monitoring usage patterns and ensure new employees are promptly enrolled in necessary training upon hiring, contributing to the ongoing success of your training program.
- Our training consultants work closely to identify compliance training requirements (i.e., PCI DSS, GLBA, FERPA, HIPAA, etc.) and determine user groups that would benefit from targeted training modules.
- We offer different Online Training Package options and assist in creating a rollout schedule for selected modules and topics based on user groups and roles.
- We provide templates for organizing enrollment notifications, sending reminders about training requirements and enforcement, delivering completion/certification emails, and integrating policy acknowledgments to ensure users understand their individual responsibilities.
- Our teams help you actively measure user progress and training effectiveness by analyzing participation rates, quiz scores, and overall engagement year over year.

Elements of a Successful Security Awareness Training Program

We incorporate the following elements to make your Security Awareness Training program successful and impactful:

- Course content updated annually to keep up with new compliance requirements and cybersecurity threats
 - Content created by credentialed CampusGuard experts to ensure accurate and timely information
 - Courses organized into smaller modules to promote micro-learning and increased training frequency
 - Scenarios common in higher education and campus-based environments so content is relevant and targeted to your staff
 - Interactive content that engages users through gamification and videos
 - Ability to customize content and appearance to include your branding, contacts, links to policies, and additional information to provide value to employees and align training with your organizational procedures
- 
- Mobile-friendly, responsive design
 - Flexible course structure to adapt to various staff roles on campus
 - Narration, closed captioning, and accessibility options (VPAT WCAG Level AA-compliant)
 - Easy-to-use navigation that allows users to pause a course and return to it later without losing their place
 - Knowledge tests and quizzes that assess the user's understanding of course material
 - On-demand progress reports to consistently track and monitor staff completion
